BIOLOGY

Learning Beyond the Classroom! Grade 12 Biology students took their learning outdoors to explore the body's defense mechanisms against infections. Through engaging collaborative discussions, they shared ideas, strengthened their understanding of immune responses, and developed critical thinking and teamwork skills in an interactive learning environment.

ENGLISH

Learning Beyond the Classroom

Students engaged in a collaborative outdoor reading session, sharing ideas, discussing the text, and strangtheing their reading and communication skills in a relaxed learning environment

RECAP

This week has been a very successful one, filled with achievements, hard work, and memorable moments from both NVS staff and students!
Parents were invited to enjoy our students' assembly performances, and midterm results were announced on Classera. We hope every student feels proud of their efforts and accomplishments!
And remember, you deserve ice cream regardless of your grades! What matters most is learning from every experience, moving forward, and always striving to do better.
NVS is proud of every single student. Keep up the great work!
