LEARNING, ACHIEVEMENTS & LIFE AT NEW VISION SCHOOL

BIG IDEAS. BRIGHT MINDS. BOLD ACHIEVEMENTS.

LEARNING HIGHLIGHTS

ENGLISH / CREATIVITY MEETS GRAMMAR

Turning verbs into stories

Grade 10 turned grammar into storytelling in a creative poster activity. Using causative verbs, we transformed an incident into a short story, combining careful language choices with eye-catching artwork. The task helped us practise grammar, develop our writing and share ideas with classmates. Who knew a grammar lesson could be this creative?

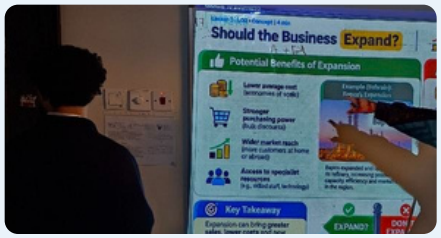
SCIENCE / MAGNETISM IN ACTION

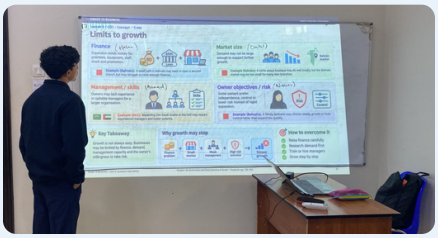
Science, in our own words

Magnets took centre stage as Grade 10 explored magnetism through visual presentations. We illustrated key concepts, highlighted the properties of magnets and explained our findings to classmates. Creating and presenting our work helped us organise information, use scientific vocabulary and build confidence in speaking. A lesson with plenty of attraction!

BUSINESS / STUDENTS TAKE THE LEAD

Learning by teaching





Grade 10 Business students took the lead in a lesson on **economies and diseconomies of scale**. Ahmed and Hassan explained the benefits of business growth, while Dalal and Nasser explored the possible drawbacks. We also discussed **limits to growth** and debated when expansion helps a business and when it creates new challenges. Teaching one another made the topic easier to remember and connect to real business decisions.

SCHOOL NEWS & CAMPUS LIFE

CELEBRATING INNOVATION

Space Apps success!

A huge well done to **Sayed Ali (10B)**, who represented New Vision School at the NASA Space Apps Challenge. His team won the **"Best Use of Data"** award, standing out among **200 participating teams** and earning medals and a trophy. A proud moment for our school community and a celebration of teamwork and bright ideas!

FUTURE PATHWAYS

Exploring what comes next

Students in Grades 10, 11 and 12 explored higher-education options at a University Fair. The event introduced us to different fields of study and encouraged us to connect our interests with possible academic pathways. A chance to ask questions, think ahead and take the next step towards our future.

SCHOOL LIFE

Between the bells

Zainab and Sara brought extra fun to breaktime with handmade sunglasses and plenty of school spirit. Between lessons, it is the friendships, shared jokes and creative moments that make Grade 10 feel like our own little community.
