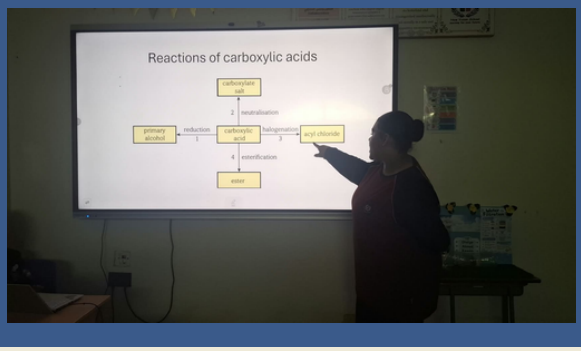
Sayed Mohammed, Mohammed abdulhusain, Hassan Mohammed from 12B competed in NASA space app challenge representing New Vision School. The team won the award for "Best use of Data", standing out and securing medals and trophy among 200 participating teams.

Learning happens everywhere—sometimes the best lessons are found beyond the classroom.

Little Teacher in Action - Grade 12C

Ghalya from Grade 12C took on the role of a little teacher and confidently explained the reactions of carboxylic acids. She engaged her classmates by sharing key concepts and explaining the reactions in a simple and clear manner. This student-led activity encouraged peer learning, active participation and confidence in explaining scientific concepts.



Student Sultan 12C, student Zahraa Ahmed 12A, and student Ali B are participating in the final rounds of the Math Symposium.

Another successful week at NVS comes to an end! This week was packed with activities, projects, and plenty of challenges. While it was certainly an exhausting and demanding week for everyone, we're glad to have made it through and can finally take a well-deserved breather. Despite the busy schedule, our students continued to give their best, and we hope the weeks ahead bring more enjoyable experiences, hopefully with a little less chaos!
